

# MODULAR TRAFFIC CABINET SURGE & EMI/RFI PROTECTION - DOT-PI

The **DOT-PI** is a modular Series Hybrid surge suppressor and EMI/RFI line filter intended for ITS traffic cabinet applications. The **DOT-PI** incorporates multiple metal oxide varistor (MOV) surge suppression stages along with a series line LC Pi filter stage to provide clean, lightning protected power in a compact modular plug-in unit. The active components are epoxy encapsulated in a rugged, high temperature phenolic case for safe and reliable operation.
